Looking to build a better hosting business?

Ensim Power Tools is an add-on to the current WEBppliance product family* that allows your users to automatically install many of the most popular Web applications available today. Only Ensim Power Tools lets you build better hosting plans, reduce your support costs and gain complete control – without compromising the security of your users Web sites.

Design more attractive hosting plans

Ensim Power Tools makes hosters' Web site hosting plans more attractive by letting users easily add content management, forums, chat, e-commerce and other capabilities to their sites.

Reduce support costs

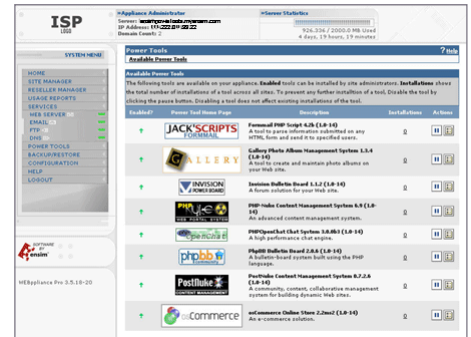

Ensim Power Tools reduces hosters' support costs by eliminating user calls for application installation and configuration.

Have complete control over your offerings

With Ensim Power Tools, hosters are in complete control. Only Ensim Power Tools lets hosters decide which applications to offer, and which users can install them. They can now offer simple entry-level plans, or advanced plans for e-commerce and Web portal hosting.

Maintain security over all your users' sites

Only Ensim Power Tools offers powerful Web application auto-installation and configuration capabilities. Most applications require the hoster to disable security features like PHP safe_mode. With other control panels, users then have full access to every Web site on the shared server. Only WEBppliance restricts users to their own Web site, allowing hosters to offer these powerful capabilities without endangering all the Web sites on their server.

Tools to Install and Configure Web Applications

*Available for WEBppliance Pro for Linux v3.5.18 and up and WEBppliance Basic for Linux v3.5.18 and up.

About Ensim Corporation

Ensim Corporation is the leading provider of software for the Web hosting industry. Today, Ensim products are used worldwide to automate each stage of the hosting life cycle. More than half of the top U.S. service providers rely on Ensim to efficiently deliver hosting services to their customers.
